Enterprise and e-business  
security solutions

## HOW DO YOU PRESERVE THE CONFIDENTIALITY AND INTEGRITY OF YOUR INFORMATION?

## HOW DO YOU PRESERVE YOUR CUSTOMERS' AND PARTNERS' TRUST IN YOU?

OKIOK can help you. Okiok represents over fifteen years of experience in IT Security. IT Security is all we do and we cover: professional services, systems integration, custom development of cutting-edge solutions, and training.

Most of our customers are from the financial community, high tech world, and governments. We have earned the trust of the most demanding customers.

In order to address industry's concerns over the constant changes in IT, Okiok has developed a wide range of services in IT Security.

The new business models born from the use of IT have brought about a number of new business risks. OKIOK proposes a set of services that will help you manage those risks in a manner that is appropriate for your business:

- ◆ Analysis of your requirements, your systems architecture, and the threats linked to your business activities. Diagnostics on the security level of your systems and identification of the areas of weaknesses.
- ◆ Product comparisons and recommendations on security measures and products that will help reduce your risks.
- ◆ As required, OKIOK can assist you with the implementation of specialized security systems, security infrastructures, the integration of new security systems in your existing environment as well as with the training of your staff.

## CUTTING-EDGE SOLUTIONS

When off-the-shelf products cannot meet your needs, OKIOK can develop custom state-of-the-art security solutions. We can develop applications or solutions based on a wide range of technologies such as: banking terminals; telecom; wireless; cryptographic cards; smart cards; biometrics; etc..

## CHARACTERISTICS

Whether you wish to add specific security expertise in a timely fashion, or to simply complement your team of security professionals, our experts can get involved at any stage of your projects.

OKIOK's expertise is not tied to a particular vendor, brand or product. We are proud to offer unbiased advices in all facets of IT Security.

Our team is composed of engineers, analysts, mathematicians, cryptographers, as well as gifted communicators. In addition, everyone of our experts can rely on the assistance of his/her colleagues. This approach allows you to leverage the expertise of the whole OKIOK team when you call on the services of a single expert.

We have built our expertise in the most demanding environments (e.g., financial institutions, governments, transactional e-commerce sites, etc..). Our team knows how to work under pressure and deliver a quality product on time.

*OKIOK DATA is a leader in the field of computer security. Since 1973, the company has distinguished itself through the excellence of its products and the high quality of its services.
